The Belgian Shepherd Dog Club of Qld Inc moves the following motion.

“That the ANKC adopts the following policy of Interbreeding of Belgian Shepherds, effective immediately, to supersede the existing policy”.

POLICY

The ANKC permits interbreeding between varieties of Belgian Shepherds when needed for promoting health and genetic diversity (in accordance with FCI General Assembly 2011) – avoiding breeding long coated to wire coated or risk of untypical coat texture.

Breeding combinations permitted

1. *Groenendael x Tervueren*
2. *Tervueren x Malinois*
3. *Laekenois x Malinois*

The progeny of the inter-variety mating is registered in the ANKC Stud Book, each puppy according to its variety.

Signed

Kathryn Winton
