10th March, 2018

The Secretary,
Belgian Kennel Club SRSH-KMSH,
Av. Albert Giraud 98,
1030 Brussels,
Belgium.

Dear Mr Wastijn,

Belgian Shepherd Dogs – breeding recommendations

I am writing to you on behalf of the Belgian Shepherd Dog Club of Queensland (BSDCQ) in relation to the notice in the September 2017 newsletter issued to all SRSH-KMSH members. This announced the changes to breeding recommendations, in particular, for Belgian Shepherd Dogs.

We note that crossings now allowed in Belgium for Belgian Shepherd Dogs are:-

- * Malinois x Tervueren
- * Malinois x Laekenois
- * Tervueren x Groenendael

It is noted that “making the right combination remains the responsibility of the breeder”.

Can you please advise me if we are correct in our assumption that, since this Sept 2017 decree, no prior approval is required by a breeder in Belgium to proceed with a breeding within the above listed limitations for registration?

If this is correct, ***we seek formal approval from the KMSH*** to recommend to the Australian National Kennel Council that they proceed immediately to introduce and implement these breeding recommendations in their entirety for international uniformity.

We thank you for your ongoing support with this matter of breeding recommendations for Belgian Shepherd Dogs.

Yours faithfully,

Kathy Prentice
